(Ref.) Results for the Fiscal Year Ended April 30, 2017	248,110	14,563	15,080	7,949	250.71

Note: Earnings per share is calculated including new shares issued through a public offering (2,820,000) a private placement (270,000) and a private placement for a secondary offering using an over-allotment option (450,000).

2. Reason for revision

In dispensing pharmacy business, drug price per prescription has exceeded the initial forecasts. In addition, profit ratio has improved supported by lower costs due to greater business efficiency both in dispensing pharmacy business and in drug and cosmetic store business. In drug and cosmetic store business, the AIN HOLDINGS Group (the Group) expects profitability in full year by the rise of sales at existing stores.

In view of these situations, the Group has decided to revise the consolidated business performance forecasts for the fiscal year ending April 30, 2018 announced on June 6, 2017.

Note: The above business performance forecasts have been produced based on information presently available. It is possible that in the future actual results may differ from the anticipated figures for a variety of reasons.
