

## AIN PHARMACIEZ INC.

December 2014

## Results Overview

## Of Consolidated P/L

In the first six months of the fiscal year, net sales rose $6.3 \%$ year on year to $¥ 88,220$ million, reflecting the opening of new dispensing pharmacies and M\&As. Ordinary income declined $13.8 \%$ to $¥ 4,451$ million due to rising procurement costs, and net income decreased $12.9 \%$ to $¥ 2,525$ million.

## of Dispensing fee revisions(1)

Key technical fees that are the major items in dispensing fee revisions, but the fees per prescription in the revision of April 2014 are being recovered. It is possible to absorb negative impact by participating in home healthcare service and promoting the switch to generic drugs in this full-year.

## Promoting home healthcare services

The number of stores that gained premiums for home healthcare services was 274 . To promote the home healthcare services, it is important for the local medical institutions and nursing institutions to cooperate with. We will use our sales strengths and actively promote them.

## Promoting Generic Drugs

Compared with the target which the Ministry of Health,Labour and Welfare advocated that "the Generic drugsôshare have to be $60 \%$ by the end of March 2014", Our generic dugsôshare was $63.1 \%$ and average premiums were 17.6 points at the end of October. We will continually promote switching generic drugs and achieve $65.0 \%$ and 19.5 points in the end of April 2015.

In the second quarter of fiscal year ending April 2015, net sales was above the result in previous year by opening new stores. However, ordinary income was below due to the effect of dispensing fee revisions and consumption tax increase. We will achieve the full-year plan by acquiring technical fees and boosting operational efficiency.

■New store opening aggressiveness 2 Q result is progressing above the plan. Especially in M\&A deals, the number of stores is 33 .

■ Response to dispensing fee revisions
We will make up for the effect of revisions by taking measures for standards for dispensing system premiums, premiums for generic drug dispensing systems, pharmaceutical management fees.
$\square$ Store activation by pharmacy-led project
We will improve storesôefficiencies by saving patient waiting times and reducing stocks. Furthermore, we reposition employees by increasing the number of prescriptions which are dealt with by each pharmacist, and make our stores more profitable.

## We will achieve our target by expanding our business by opening new stores and making our existing stores more profitable.
